

The Trident Range by Chubb safes

- Trident is the latest range of high-security safes, graded from III to VI.
- But the Trident range offers more than just burglary protection: it also carries fire and explosives protection.
- Three labels to cover most security risks!
- Available in various sizes, it can also be equipped with different options.

Chubb safes
Trusted the world over.

Testing and Certification

- All of our safes and vaults undergo stringent testing procedures.
- Burglary, fire and explosives tests are carried out in accordance with the toughest international standards.
- Importantly, tests are carried out by established, independent test institutes – ECB•S, UL, SP.

- They also issue the certificates which guarantee the level of burglary and/or fire protection which Chubb safes' secure storage products provide.
