

You need tried-and-tested protection against burglary and fire for valuable items, cash, documents and vital records. Ideal for home and business environments; the newly redesigned ECB•S certified, Rhino Mk II meets these security needs and you are certain to find the model for you from within the five available sizes. You benefit from a convenient and user-friendly solution that meets the rigorous security standards you expect from Chubb safes.

Rhino Mk II

BURGLARY- & FIRE-RESISTANT PROTECTION

New-and-improved design for unparalleled convenience

The Rhino Mk II range has been completely redesigned to enhance **convenience** and **user-friendliness**. Each of the following features has been remodelled and refined for optimal performance:

- **Body**
Benefit from a **robust** and **durable** model that boasts an overall 65mm barrier thickness made up of a high-density monolithic casting contained within inner and outer steel casing.
- **Door**
Ensure **secured access**, the solid composite 35mm thick door is combined with additional protection plates to protect crucial locking areas. Solid steel moving bolts with a 28.5mm diameter affix the door to the body, while fixed “anti-heeling” bolts on the door’s rear edge protect the hinge side.
- **Lock**
Gain **enhanced control** via the Sargent & Greenleaf certified three-wheel combination locks, and the high security double bitting, key lock.
- **Base fixing**
Enjoy **increased resistance** and protection against unauthorised removal thanks to the anchoring holes. Two security fixing bolts ensure that the safe can be firmly fixed to the floor when installed correctly.

BURGLARY & FIRE
PROTECTION

A tried-and-tested safeguard against fire and burglary

Rest assured knowing your valuables are protected against burglary and fire: the Rhino Mk II range has been tested in accordance with **EN 14450 Level S2** and is **certified by ECB•S**. The new door built from specialised materials ensures unrivalled protection against fire.

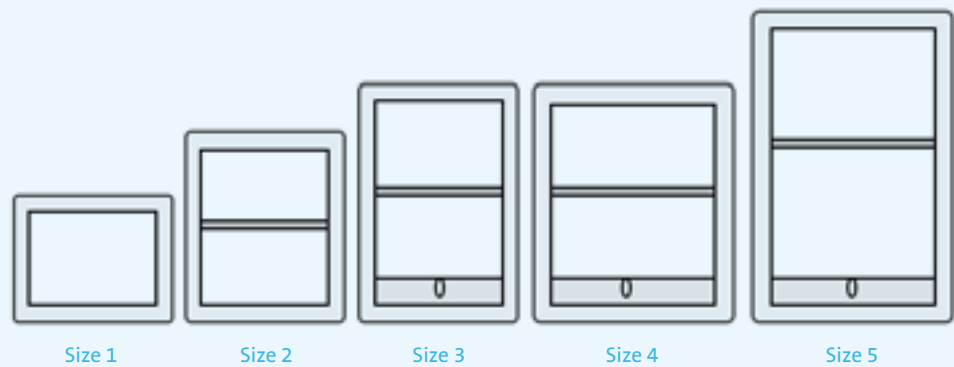

Rhino MkII is tested in accordance with the **Japanese Industrial Standard JIS S1037**. In the event of a fire, your documents are protected for up to 60 minutes.

5 size options to meet your security needs

Whether for home or office use, Rhino Mk II offers a range of options to customise your safe to your security needs. Choose from **five practical sizes**, ranging from 400 to 980 mm in height and from 32-

179-litre capacity. Most sizes include a shelf as a standard fitting, and several include a full-width drawer for greater convenience.

Your choice of 5 sizes

Model	External (mm)			Internal (mm)			Weight (kg)	Volume (litres)	Fittings	
	Height	Width	Depth	Height	Width	Depth			No. shelves	Full-width drawer
Size 1	400	500	502	270	370	320	185	32	0	0
Size 2	600	500	502	470	370	320	225	56	1	0
Size 3	750	500	502	620	370	320	265	73	1	1
Size 4	750	630	602	620	500	420	373	130	1	1
Size 5	980	630	602	850	500	420	467	179	1	1
