

The filing cabinet Profile NT provides efficient storage capacity and protects your vital documents from fire

Profile NT 60

FIRE-RESISTANT DOCUMENT PROTECTION

Key Features

- High quality filing cabinet for efficient storage of important documents.
- Tested and certified in accordance with the most common and well-established standard in Europe, NT Fire 017, for 1 hour's fire protection.
- High storage capacity – the 31" cabinet is available with 2, 3 or 4 drawers and the 22" cabinet with 2 or 4 drawers.
- Painted in a light grey colour, electrostatically powder-coated with a glossy finish. Blends nicely into any office environment. Easy to position with small external dimensions in relation to capacity. The 22" cabinet with 2 drawers fits nicely under a desk.
- The total internal height is 291 mm, suitable for any file size available on the world market.
- Lighter weight construction compared to other cabinets on the market, which means smoother transportation and installation.
- Steel inner lining in each drawer to protect the contents from insulation dust.
- Steel dividing plates between each drawer to avoid unauthorised individuals getting access to anything in a locked drawer via an open drawer.
- High quality steel sliders in all cabinets to ensure smooth operation and full drawer access.
- All cabinets fitted with high security locks as standard.
- The handles with integrated card-holders provide a system for labelling each drawer for easy location of stored documents.
- Profile NT 60 is manufactured in accordance with the ISO 9001 quality management system and the ISO 14001 eco-management system.

Lock Options

Combination lock

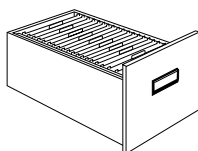

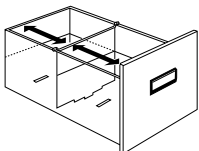

Key lock

All Profile NT 60 filing cabinets are fitted with high security locks as standard. They can be equipped with a central key lock for single locking or together with a mechanical combination lock for dual central locking. In addition each individual drawer can be fitted with a key lock. If required it is also possible to operate more than one cabinet with the same key.

Internal Fittings

Each 31" drawer has additional suspension bars as a standard feature, which can be easily mounted to reduce the width to suit A4 files.

The 31" cabinets can be prepared to include 3 dividers per drawer as an option for increased storage possibilities, and each drawer has slots in the bottom plate for flexible placement of the dividers.

Fire Testing

Profile NT 60 protects all paper documents against fire. The cabinet is tested and certified according to the most common and well-established standard in Europe, NT Fire 017, in fire class 60 Paper, which means that the cabinet can withstand a fire for one hour. The testing procedure is described below.

Stage 1

The cabinet is placed in the furnace and heated to a temperature of 1090 °C for 60 minutes to simulate an extremely severe fire.

Stage 2

The cabinet is taken out of the furnace after 60 minutes and cooled down with water. When the cabinet is opened the maximum inner temperature must not exceed 150 °C.
